

*Unique One of a Kind Doors*

*"The quality you have been looking for!"*

Thank you for taking the time to consider purchasing a Quality **Hildebrandt** Lifetime Garage Door System. Rest assured that the **Hildebrandt** door you select will last for decades to come.

Our philosophy is simple, use quality upgraded parts to ensure a high quality product. We use stainless steel cables, thicker steel, a safer hinge system and longer life springs, which all add up to producing a quieter, stronger and safer garage door system.

Your purchase of a garage door is an investment in your home that must last year after year. **Hildebrandt Garage Door Co.** is dedicated to making that investment a wise one.

## *There's More Behind Our Door!*

Hildebrandt's patented pinch resistant flat hinge system limits the door section opening to 1/4" helping to keep hands and fingers out of the joint section. 11 ball bearing white nylon rollers for quiet operation. Optional white powder coated track and hardware available.

High quality die cast drums and 1/8" stainless steel lift cables give you a lifetime of smooth rust-free performance and quiet operation. RED set screws draw attention to extreme tension DO NOT TOUCH AREAS!

Dura-Hem Commercial grade heavy-duty galvanized track system. Safer design: no large holes in track. Prospector gold zinc shaft and Delrin tire.

## **We back our custom garage doors two different ways...**

### **Premium-Plus Steel Back Insulated Door**

This steel back door features a 24 Gauge front skin, a full cavity of 2" thick environmentally safe polystyrene, and a textured embossed white 26 Gauge steel skin backing. Combined with a rigid urethane adhesive system, this layered process offers durability, reliability and a bright clean appearance. This door has an energy rating of R9.

### **Poly Back Insulated Door - Standard**

This 24 Gauge front skinned door has our exclusive rigid Corra Poly Backed CFC free environmental safe polystyrene insulation and is second to none. Strength comes from it's corrugated design. Most vinyl/poly back insulated doors use only a single layer backing that punctures, dents, or rips easily. Some competitor's doors even delaminate at the slightest hint of warm temperatures.
